- Piracicaba, SP, Brasil

About me

Data Scientist with a strong background in data analysis, complex problem-solving, and analytical thinking.

Passionate about turning raw data into predictive and prescriptive solutions through Machine Learning algorithms and Statistical Modeling. Experienced in the full Data Science project lifecycle—from data engineering and model building to validation, optimization, and deployment. I use my expertise to generate strategic insights and drive business growth and innovation.

Professional Experience

Senior Data Management Analyst, Marsh McLennan

May 2024 - Present

- Create dashboards and reports to support strategic decisions and monitor critical KPIs.
- Work in constant collaboration with global teams, using English and Spanish daily.
- Develop automations in Python and VBA that optimize processes, reduce operational costs, and eliminate manual tasks.
- Act as a regional data management reference in Latin America and Mexico, leading governance initiatives, implementation, and support for Darwin (internal SaaS platform).
- Bridge global product teams and local users, translating business requirements and adapting solutions to regional contexts.
- Implement data governance strategies ensuring data quality, security, and consistency.
- Collaborate on digital transformation and change management projects, promoting the adoption of new platforms and technologies aligned with global guidelines.

Data Analyst, Data Mundo (Jan/24 - May/24)

- Developed end-to-end BI solutions, from prototyping in Figma to delivering interactive dashboards and analytical reports.
- Built and automated ETL processes using Pentaho, SSIS, and SQL to model and make data available for analysis.
- Ensured LGPD compliance across all projects, applying best practices in data handling and security.
- Achieved a 17% increase in customer revenue (YoY) by proposing and implementing a new audience segmentation strategy based on data analysis.

NDT Analyst, Grupo Priner (Feb/22 - Jan/24)

- Analyzed Non-Destructive Testing data to identify patterns and anomalies, translating them into technical reports and engineering insights.
- Ensured project compliance with technical standards, reducing safety and operational risks.

Engineering Intern, Grupo Priner (Jun/21 - Feb/22)

- Designed and developed a new commercial reporting system with centralized KPIs, which became the standard for departmental management.
- Supported contract negotiations through market research and projections analysis.

Education

Bachelor's Degree – Mechanical Engineering

Escola de Engenharia de Piracicaba (2019-2023)

Postgraduate – Data Science

Faculdade VINCIT – (2024-2025)

Certifications and Courses

- Python for Data Analysis and Data Science
- SQL for Data Analysis and Data Science
- Advanced Excel with VBA
- Power BI for Business Intelligence
- Applied Mathematics and Statistics for Data Science
- Data Science for Multivariate Data Analysis
- Business Analytics and ML for Data Science Projects
- Time Series Modeling and Real-Time Analytics with Apache Spark and Databricks
- Cloud Computing in Data Science (with Amazon SageMaker and Microsoft Fabric)

Tools and Technologies

- Excel/VBA
- SQL
- Python
- Linguagem R
- DAX/M
- Power BI
- Tableau
- Looker Studio
- Apache Spark
- Apache Airflow
- Duck DB
- Databricks
- AWS
- Microsoft Fabric

Hard Skills

- Data Cleaning and Modeling
- Descriptive and Inferential Statistics
- Hypothesis Testing
- Supervised and Unsupervised Learning (Regression, Classification, Clustering)
- Predictive and Prescriptive Modeling
- Feature Engineering
- Machine Learning Algorithms
- Code Versioning (Git/GitHub)

Soft Skills

- Problem Solving
- Assertive Communication
- Logical Reasoning
- Storytelling
- Agile Methodologies
- Teamwork
- Project Management

Languages

- English – Fluent
- Spanish – Advanced
- Portuguese – Native.
